

HP-4601 / HP-4602

Problem Eliminator!

Sway Bar Link - Repair Kit
 Ford / Mazda Trucks

HP4601 Single Stud Kit

Repairs links with one pre-installed stud

See separate page for updated application breakdown

2 kits required per vehicle

Napa	McQuay	Moog	TRW
265-1543	SL-422	K80085	18339

RAMCOA Improved Design Stud

RAMCOA's Hex Head design stud allows a standard wrench to hold stud while installing or uninstalling.

O.E.'s only concern is how much time they can save on installation at the factory, not how much of a headache it will be the installer when the OE part wears out.

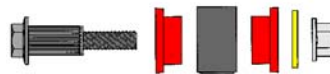

HP4602 Double Stud Kit

Repairs links with two pre-installed studs

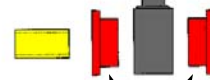

Year Model Location

See separate page for updated application breakdown

Napa	McQuay	Moog	TRW

Single Stud Kit

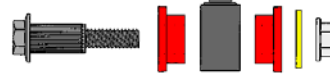

Special 2 Piece Design Bushings

Allows Easy Installation!

Premium Thermoplastic Rubber

Double Stud Kit

Manufactured in the

Problems... Problems... Problems...

The bushings wear out on these type links and Ford has over 15 different part numbers to carry. RAMCOA covers them with just 2 problem eliminating kits.

OE Pre-Installed Stud

\$\$\$\$\$\$\$\$

No way to hold stud from turning when parts need to be removed.

Making a simple job into a difficult job.

Standard rubber wears out, cracks & dry-rots, allows excessive movement and can squeak.

Can you afford to keep stock on hand for all these Applications?

NOW YOU CAN!

with **RAMCOA's Total Solution!**
